Peer-to-peer (P2P) app scams occur when fraudsters trick users into sending money or sensitive data on platforms like [Venmo](#), [Cash App](#), or [Zelle](#). Because P2P transactions transfer funds instantly and generally **cannot be reversed**, victims rarely recover their money.

QUICK TIPS TO AVOID SCAMS

- Never share passwords, PINs, or security codes.
- Be cautious of unexpected calls, texts, or emails claiming to be your financial institution.
- Don't click suspicious links or open attachments from unknown senders.
- Monitor your accounts regularly for unauthorized transactions.
- When in doubt, call OMEGA directly using a trusted phone number.
